### Готовое приложение:

# Код activity\_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:orientation="vertical">

<ListView</pre>
```

```
android:id="@+id/lvMain"
    android:layout_width="match_parent"
    android:layout_height="match_parent"/>
</LinearLayout>
```

#### MainActivity:

```
package com.example.listview
import android.widget.ArrayAdapter
import android.widget.ListView
import androidx.appcompat.app.AppCompatActivity
class MainActivity : AppCompatActivity() {
        setContentView(R.layout.activity main)
        val listView: ListView = findViewById(R.id.lvMain)
        val names = arrayOf("плейлист 1", "плейлист 2", "плейлист 3",
        val arrayAdapter = ArrayAdapter(this,
android.R.layout.simple list item 1, names)
        listView.adapter = arrayAdapter
            val selectedItem = names[position]
            startActivity(intent)
```

## MusicListActivity

```
package com.example.listview
import android.os.Bundle
import android.widget.ListView
import androidx.appcompat.app.AppCompatActivity

class MusicListActivity : AppCompatActivity() {
    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
        setContentView(R.layout.activity_music_list)

    // Получаем название плейлиста из интента
    val playlistName = intent.getStringExtra("playlistName")

    // Заголовок активности
    title = "Музыка: $playlistName"
```

```
val songs = when (playlistName) {
   "плейлист 1" -> listOf(
                        ListItem(R.drawable.cat, "Песня 1", "Play"),
ListItem(R.drawable.cat, "Песня 2", "Play"),
ListItem(R.drawable.cat, "Песня 3", "Play")
                        ListItem(R.drawable.cat, "Песня А", "Play"),
ListItem(R.drawable.cat, "Песня В", "Play"),
ListItem(R.drawable.cat, "Песня С", "Play")
                  else -> listOf(
                       ListItem(R.drawable.cat, "Песня X", "Play"),
ListItem(R.drawable.cat, "Песня Y", "Play"),
ListItem(R.drawable.cat, "Песня Z", "Play")
            val adapter = AdapterList(this, songs)
            listView.adapter = adapter
                  val selectedSong = songs[position]
Toast.LENGTH SHORT).show()
activity_music_list.xml
<?xml version="1.0" encoding="utf-8"?>
      android:layout width="match parent"
     android:layout height="match parent"
      android:orientation="vertical">
      <ListView
            android:id="@+id/lvMusicList"
            android:layout_width="match_parent"
            android:layout height="match parent"/>
```

## list item.xml

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:orientation="horizontal"
    android:padding="10dp">

<ImageView
        android:id="@+id/ImageView"
        android:layout_width="50dp"
        android:layout_height="50dp"
        android:layout_marginEnd="10dp"
        android:src="@drawable/cat" />
```

#### ListItem

```
package com.example.a7laba
data class ListItem(val imageR: Int, val text: String, val action: String)
```

### AdapterList
